THE HEALTH-BEAUTY CONNECTION

BEFORE

AFTER

To help mask old bonding, tooth discoloration and uneven teeth, among other aesthetic concerns, Dr. Cintron used veneers to transform this 26-year-old patient's smile, delivering the natural, yet aesthetic, results her patient requested prior to treatment.

Believing that a gorgeous smile is a byproduct of a healthy dentition, Dr. Cintron performs **METAL AND SILVER FILLING REMOVAL** and comprehensive smile makeovers. "Oral health translates into a smile that radiates beauty," says Dr. Cintron, whose smile makeover procedures involve thorough examinations prior to treatment, to ensure the mouth is properly aligned and free from cavities. "We seek to inspire other doctors and the public through our use of cutting-edge cosmetic and biocompatible dental protocols." Moreover, whether she's wielding a laser or performing a **COSMETIC PERIODONTAL PROCEDURE**, Dr. Cintron only does so after thorough evaluation of overall dental health. "Patients deserve a comprehensive analysis, relating to both **SYSTEMIC HEALTH AND AESTHETIC APPEAL**. My approach seeks to ensure long-lasting, beautiful results."

lifelong investment

For smile maker Dr. Yolanda Cintron, cosmetic dentistry provides her the opportunity to "help patients get where they want to be." "Invest in yourself; your health is your wealth," says Dr. Cintron—who focuses her cosmetic-driven practice on improving patients' mind, body and spirit connection through the incorporation of innovative technologies, personalized treatment plans and an experienced, highly trained team dedicated to patients' comprehensive dental health.

Patients of The International Center for Dental Excellence are privy to what Dr. Cintron refers to as "relaxation cosmetic dentistry." "We believe in inspiring patients' physical health, in addition to their spiritual stability, guiding them toward optimal health and wellness, for life," says Dr. Cintron. In doing so, she considers each patient a "partner," working with him or her to promote optimal oral health and peace of mind. "Some people are terrified of the dentist, of losing control, of not knowing the outcome, of being misunderstood. This has prevented them from getting the help they so desperately need. Furthermore, not smiling with confidence has negatively affected their social and professional lives." With her commitment to continuing education and her use of up-to-date technologies, Dr. Cintron provides a high level of care. The combination of compassion, communication, prevention, experience and skill allow Dr. Cintron and her team to fulfill each patient's objectives and dental needs with proficiency and accuracy. Dr. Cintron's analytical approach incorporates multiple factors, including analysis of patients' fears, concerns and goals, as well as ideals about what they desire in their dream smile. As a result, each one of her patients walks away with clarity and a customized plan that seeks to release inner and outer beauty in as few visits as possible. "My goals for each patient go beyond treating their teeth. I want to raise their standards of health and beauty, delivering quality results that will help patients keep their teeth for the rest of their lives." Moreover, a gentle touch, compassionate demeanor and years of experience are all part of the care that has earned Dr. Cintron a well-established reputation.
